

We Build Consciously

We take sustainability into account already from the start up. During our renovation and construction phase, we have taken the environment into account each step of the way.

All our hotels are BREEAM In-Use certified with at least 'Excellent'

We performed an energy study on our buildings to understand how we can improve energy efficiency

Extra insulation of our windows, roof and walls

An ecological study of our building showed us how we can support our local biodiversity

70% of our roof is covered in plants and we have insect hotels, bird and bat houses

We assessed the climate related risks of all our hotels through a Climate Risk and Vulnerability assessment

All construction materials have a material passport documenting the environmental impact

We instruct our designers to adhere to our Circular Program of Requirements for the interior design of our properties

We document on the composition and materials of our interior design

We select our furniture and interior based on the environmental impact of the materials and alignment on the principles of the circular economy (reduce, reuse, recycle)

100% of our custom made furniture is from certified wood from responsibly managed forests

Interior

Sustainable Development Goals

Our standards are supporting the UN sustainable development goals

7 AFFORDABLE AND CLEAN ENERGY

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

11 SUSTAINABLE CITIES AND COMMUNITIES

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

13 CLIMATE ACTION

15 LIFE ON LAND
